(HEROES Of The NEW WORLD GAMEPLAY) LEVEL 1 HEADING: The Black Hole Cave - right after dungeon level where player waiting for level 2 - 3 secret rooms - a spawn point INSTRUCTIONS: - Rkill zombies and take ammo - Find Secret Room to open up next level --- ULTIMATE PACKAGE - EXTRA ITEMS - Ninja Mask, Boosters, Sandvich WARNING: There is a MOB ACTUALLY. Tips and Tricks: The Black Hole Cave level 1: When to fight, and when not to fight? You start to get the hang of things once you step into the Black Hole Cave level. Look at the teleporters on this level. If there is a teleporter close to you, you must stop near it. Moving forward toward a teleporter will do you no good. You must move back and forth across the teleporters to unlock the next level. This is a good place to get some practice at dodging the Zombie. This is an odd level. There are loads of teleporters for you to move between, but there are also 4 zombie spawners - always aggro them! You can see them behind the teleporters when you are close enough. You can also see the 4 automag turrets near the teleporters. Be sure to put a little bit of distance between yourself and the zombies and automag turrets so that they can't get to you. Additionally, the location of the teleporters is different to usual level layouts. Some may feel like they are not moving fast enough. Again, this is a good opportunity to practice getting into a rhythm with a map. After a while, you will start to see patterns and will be able to move faster. This level does not have any shields. The enemies seem to be more aggressive than in other levels, but that's normal. You can knock them down if you feel they are too much for you. Tips and Tricks: The Black Hole Cave level 2: Heading to the secret tunnel and the 6 teleporters You start to get the hang of things once you step into the Black Hole Cave level. Look at the teleporters on this level. If there is a

Description Translations - Translation Tips #5 In this episode we will discuss how to improve your translations! Do not let the good nature of the episode put you off, these are sound techniques which should help you to improve your work in future. Name Number 1. Improve your "Figures", Use the Charts and Pics Your first step to a good translation is to start off with a good structure. So let's take

this sentence as an example: He is the man with the scar. You could do this translation: • He is the man with the scar, H im è t i e l l e a d i n t h e s c a r. This translation is not very good, it does not work great in English and has a very dynamic way of using the letter “h” in this sentence. So if you want to make a translation, you need to use the correct forms of other letters but you need to use the correct vocabulary and structure. So take a piece of paper and make a sketch of a table inside. So here is my example: Figure 1: Translation Table Figure 2: Figure 1 with corrections Figure 2 has been done in the correct way and so you can see that the first letter of each word has been written in a way that each word is aligned with the others. You can also see that the use of “i” for the verb’s “I” and “we” and “you” could only be used with a single pronoun, it is not possible for this to be done with “you” in English, as “I” which is the same as “me”. So that now you have your table, you need to translate the first letter of the words in figure 1 which means you could use any word you want from the vocabulary to translate the first letters. However, if you look at the phrases in figure 1 that have more than one word, then you need to worry about using the correct word structures. In this way your work will improve, so let’s take a more challenging sentence. Name Number 2. Make the Letters Work Together If you look at the first example, one of the issues is that the word “fig
