Fabric began as a tiny 2D puzzle platformer, released in 2009 for the XBLA. Following a wonderful reception, we made it cross-buy for PC and Mac in 2010. The levels were a little too confusing though, so we removed the jump system in 2011. After a major redesign we released it as Fabric in 2012, doing away with all puzzles. The premise was to be a first person puzzle game where fabric would be your only means of interaction. Unfortunately, in the run up to release we came across an interesting bug. We couldn't save. When you died the game would always restart where you died. So you'd start out in a part of the level only to discover the next door you had to open was locked! So you'd rewind time, restart and repeat. There was a solution to this though, and we took that as a sign of our game potentially being a bit of a sleeper hit. Unfortunately it was a really difficult puzzle game to make. It came along in a period in which resources were low, leading to numerous delays. The result is a fantastic game that's a difficult but rewarding puzzle game and that's definitely not something we set out to do. This is the best way to play the game, we haven't found a way to make levels that are too challenging yet. We've tried making things a bit easier before, but the bottom-line is it's a very tough game. In releasing this soundtrack we hope you might be able to hear just what a difficult and challenging game Fabric is, but also that there might be something there for you. ----  
---- Music and other Sounds: We have created a huge range of sounds for Fabric, including worldmusic, ambient, various tools you'll use, some sound effects and a lot more! Not all sounds in the game were written by us though. You'll find what's there has been selected with particular care. We're really proud of the attention to detail that goes into Fabric. Some sound effects like cloth tearing are played by the most famous cloth simulation sound designer in the world, James Thing! ---- ----- -- Are you a fan of the game? Dungeon Siege III 3rd expansion for the PS Vita released. Storyline: When the Lord of Terror, a demonic being of unimaginable power, was sealed in a dungeon hundreds of years ago, he sealed his monstrous army, known as the denizens, inside with him. When the seal was broken, the denizens rose up and laid waste to the surrounding lands, dragging the land into a dark age with them. Now in present day, this army of demons is free, and has risen up to take revenge on the world. As the last chance to save humanity, mages from across the land will take up arms to seek out the maniacal Lord of Terror, and uncover the secret behind his immortal army. Features: Play as one of 16 new heroes, and bring their unique set of skills to bear on the demonic horrors that stand between you and victory. Can you stand against the denizens of the dark? A satirical RPG-platformer game in the style of GTA. A parody of the whole series that tries to show that a humanity with a ridiculous tendency to believe in what couldn't be real. In other words: make a game like hell. Among the NPCs you can choose to play them as or even rescue them from the devil that's trying to kill them. You will meet other people from other parts of the world, you will gain experience and will learn more about this hellish world. Features: - NPCs - multiple comic poses - friendly or hostile mobiles - practice'em up - hand made graphics (cg) - access to the entire collection from a list - smaller sized main-menu - speechbubbles, in game-text (English) Pixel64 is a new retro 256 bit (10-bit) pixel graphics game engine that maintains compatibility with arcade and home hardware. This is an arcade game, but with some original ideas and graphics. The top-view of the game is from an overhead perspective as you fight to save a princess and her kingdom from a horde of ferocious monsters. It features arcade-style settings and graphics, which include an animated and 3D environment, original characters, music and sprites. The world map and characters are fully animated and easy to use. You can set your own destinations on the map and you will be transported there, using the best approach in the past, real time, to overcome the danger and do your best in saving the world. Features: - Arcade styles settings - Original

“Wintermoor Tactics Club is a tactical RPG that combines innovative team formation and turn-based strategy. In a war-torn country, you, a powerful Wintermoor tactician, must lead a group of soldiers to complete a variety of objectives. In this game, you command your squad to move around on the battlefield, attack, and defend. The story takes place after the fall of the ruling party, with power firmly in the hands of a former politician named Zexion. This former politician continues to consolidate power, however, with his revolutionary ideas, and everyone is in danger! Wintermoor Tactics Club is a game where you fight battles in real time using powerful fantasy weapons. The battles are divided into turn-based stages, and every stage plays out in real time. The idea of Wintermoor Tactics Club is to create a game with not only a story with drama and action, but a game that is easy to follow, and not too challenging to win. The goal is to have a game where you can lose as many times as you want to and still enjoy the game. Our game design philosophy is, ‘Play the game without thinking of winning, and play the game without thinking of losing,’ and we believe this has made Wintermoor Tactics Club an excellent game. -Tactical Operations Wintermoor Tactics Club uses a tactical operation style for battle. In each operation, a battle takes place, and the character can make a variety of attacks and parries. These attacks include attacks on the character, attacks on the enemy, and evasion. In this game, evade is extremely important. If a character is attacked from behind, it is possible to evade with the dash button, and it will break the enemy’s attack. If that character strikes back, the counter attack on the enemy is stronger. If this character is defeated, he or she is eliminated. Operations are also divided into turn-based stages, and the turns are activated by the red button. During the turn, the party leader commands the party for a move of one character, or a move of the whole party. In the end, we are creating a game where we want the player to play simply and enjoy the game. Thus, the idea behind Wintermoor Tactics Club is to make the player to play all of the game as if they were really battling, and enjoy the game until the end.” System Requirements:  
Operating System: OS X 10.
